Hershey '94

My car #H2869 was the only Sears there, despite my asking 30 owners to join me. In the highwheeler event on Friday, I came in last or second to an IHC due principally to my not having enough experience with a Schebler carb. which I installed three days before Hershey. The AACA made a video of me and the IHC going around the stadium track and an interview beforehand. At least I had a chance to open the throttle circling the track. It had 'nt been to Hershey since 1957 when four Sears were entered. Its owner then sent me photos and he again sat in the car on the show field. The next owner, Ed Fabick, who also lives in Warren, OH was at Hershey too, occupying my previous flea mkt space. This coming winter he'll have a ride in it as I discovered he comes to Daytona for the winter. He had owned for 23 years. Now he's restoring #H3491 which formerly belonged to Don Hess. The Sears meeting on Thursday was very small, but very productive. Loy Zimmerman, Paul Holland, and Herbert Sears joined me for over a most enjoyable hour. What are your thoughts about a possible meeting in '95?

F O R S A L E

The only Sears that I'm positive is still for sale is the model R pickup in FT Myers, as I phoned its owner. He has no price on it, but thinks its worth as much as an airplane, which hobby he pursues. He did 'nt reply to my sugges-

Wheel bearings. Ed Fabick. See # H3491 on page two owner's list.

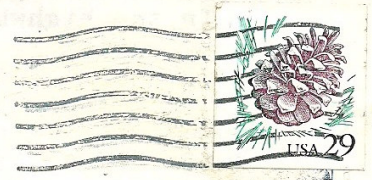

Is there a way of making my Schebler choke wire come out thru the front of the frame near the crank instead of straight up thru the floor board? There seems to be a hole already in the floor board right over the carb. But its inconvenient trying to choke it while cranking..I formerly used a Gardner carb. whose choke wire came forward, but the carb flooded too much even though there was no dirt on the float, Perhaps Ed Fabick will figure it out when he comes down next month. This issue goes to 85 past or present owners, whether dead or alive.
